EDUCATION

Computer Science, Kenyatta University

- Acquired knowledge in computer systems, networking, database management, software engineering, operating systems, and information security.
- Chairperson, Kenyatta University Catholic Chaplaincy, where I oversaw the management and maintenance of the Kenyatta University Catholic Chaplaincy website.
- Participated in planning of collaborative projects like outreach programs and shooting of Chaplaincy Album, requiring leadership, communication, and technical problem-solving skills.

SKILLS

- **ICT Support & Systems Administration**
- **Computer configuration and setup**
- **Hardware and software installation**
- **User support and troubleshooting**
- **System maintenance and monitoring**
- **Data backup and recovery**
- **Inventory management and documentation**
- **Email and productivity systems support**

VOLUNTEER EXPERIENCE

- Outreach Program Coordinator. Coordinated annual outreach programs involving more than 70 participants. Assisted in planning, communication, logistics, resource management and managed activities requiring teamwork, organization, and leadership. Supported coordination of a budget exceeding Ksh 2.1 M.

PROFESSIONAL SUMMARY

Motivated Computer Science student with practical experience in ICT support, software systems, user training, data management, and technical troubleshooting. Proficient in Windows and Linux operating systems, networking fundamentals, hardware and software installation, and supporting users in technology-driven environments. Demonstrates strong problem-solving skills, attention to detail, and the ability to learn quickly while delivering quality technical support. Experienced in working with databases, web applications, and digital systems, with a commitment to maintaining reliable and efficient ICT infrastructure.

WORK EXPERIENCE

Temporary Data Entry Assistant | Datam Limited | 2 weeks

• Worked with an internal KNEC software system to enter candidate marks and generate exam center reports.

• Entered 102,610 marks records for candidates with 99% accuracy compared to the original copies.

• Maintained concentration, consistency, and speed while working on a high-volume, deadline-driven task.

Teaching and STEM Support Assistant | Nova Pioneer, Tatu City | Jan 2025 - Apr 2025

• Designed posters to promote students' STEM projects and supported Grade 5 learners whose team won position 1.

• Taught Python and App Inventor for mobile development, helping students build at least 25 functioning mobile apps.

• Guided learners in developing basic websites and mobile applications.

PROJECTS

Project Nexus - Interactive Job Board Platform (Frontend) | React, TypeScript, Context API, Tailwind CSS, Axios, React Router, Vite, Vercel

- Built a responsive job board platform with dynamic job listings, advanced filtering by category, location, and experience level, and accessible application forms.
- Used Context API for global state management and Axios for API integration; handled loading, empty, and error states.
- Deployed the frontend on Vercel and maintained a clean architecture with a professional Git workflow.

Project Nexus Job Board Backend | Django, Django REST Framework, Simple JWT, django-filter, PostgreSQL, drf-yasg, Gunicorn, WhiteNoise

- Developed REST APIs using Django and Django REST Framework to support job board functionality and structured backend services.
- Implemented authentication with Simple JWT, filtering with Django-filter, and API documentation with drf-yasg for easier testing and maintenance.

MERN School-Based Grading System

MongoDB | Express.js | React.js | Node.js | JWT | Chart.js/Recharts

- Developing a full-stack MERN grading system with role-based authentication (JWT) for students, teachers, parents, and admins.
- Designing RESTful APIs for managing student records, grades, attendance, and report generation.
- Building a React-based front-end with analytic dashboards, real-time updates, and CSV/PDF reporting.

CERTIFICATIONS AND TRAINING (ALX)

- **Professional Foundation**
- **Design -** developed posters, magazines, and other visual designs using Figma, Adobe tools, and related design software.
- **Front-End ProDev** - strengthened front-end development skills through React, TypeScript, HTML, CSS, JavaScript, APIs, responsive design, and accessibility best practices.
- **Back-End ProDev** - built back-end systems and APIs, including the Nexus Job Board back-end project using Django and related deployment and API tools.
